

Trip report to Southern Morocco

17-21 May 2006

By

Imad CHERKAOUI &

Josep Del Hoyo

(Hand Book of the Birds of the Word Editor)

108 species was observed in this trip. The African collared dove, an accidental visitor for Morocco, was seen in the *Accacia raddiana* steppe of Akka Area the 17th. Oukaimden is probably the best place to see the Crimson-winged finch. We were able to observe the mating of a couple and the species seems to frequent the rocky escarpment with short vegetation in the breeding season.

Ostrich (*Struthio camelus*), **Bald Ibis** (*Geronticus eremita*) & **Cream-coloured Courser** (*Cursorius cursor*) was observed by Josep Del Hoyo in Souss-Massa park. The Photos was taken by Imad CHERKAOUI Using Konica Minolta Z6 (Eq 420 mm)
